Under the action and advisory programme entitled: 'Mobility management in businesses' SEEG, a project partner of klima:aktiv mobil, received an award from the Austrian Federal Ministry of Agriculture, Forestry, Environment and Water Management for its expertise in climate protection. The certificate was formally presented by federal minister Josef Pröll to SEEG chairman Josef Reiter-Haas in spring 2007

For the first time in Austria SEEG had the enormously prestigious distinction of being awarded first prize at the World Energy Globe 2001 awards among 1,230 entries from 83 countries for the Mureck energy cycle and confirmed that the company is on the right path for the future. SEEG Mureck seniormanager Karl Totter receives the award, with Hans Dichand on the left and presenter Frank Elstner on the right.

Technology meets Service

Customized and sustainable functional energy systems are a challenge for technology and service, from individual planning and manufacture via financing through to maintenance and service.

We are committed to meeting this challenge and accompanying our customers through the entire process. In the merging of tvp energy systems with M+M cogen, we have taken a large step forward in order to fulfill these demands perfectly. We constitute the interplay between technology and services, which is where we have our roots – a leading producer of cogeneration plants and a specialist in maintenance and service go together to provide this new full service provider etaone. Fascinated by technology and flexible in our structure we strive for the ideal: the best that is imaginable. Physics defines a perfect plant with an efficiency factor of one. And we have made this claim our name.
